

OchreSoft Technologies Referral Scheme

What is it?

The OchreSoft Technologies referral scheme is designed to reward loyal clients who introduce other practices to OchreSoft's market leading case management system "Intelliworks".

In the normal course of business many of our existing clients have recommended our Case Management product Intelliworks to other companies purely for altruistic reasons. As this recommendation has commercial value we would like to reward any referrals that we achieve a positive sale from.

How does it work?

Go to www.ochresoft.com and click on the Referral Scheme link on the homepage to send us an email with your company name and contact details. Once we have received your registration you are then able to start referring companies to us via the referral link on the website, by emailing sales@ochresoft.com or by contacting our sales department on + 44 (0) 1793 836745.

There are two types of referral:

Companies known to OchreSoft – Companies that we have met in the past but do not appear on our three month sales forecast. We will immediately let you know if the company does not qualify and as we recognise that it is in our interest to work with you, we will be honest!

New company – Companies that are not known to OchreSoft meaning that we have not visited their premises to demonstrate our solution.

What's in it for you?

For companies known to OchreSoft, £500 will be paid to the referrer on the successful sale and subsequent payment of the sale.

For new companies, £750 will be paid to the referrer on the successful sale and subsequent payment of the sale.

The fine print

- Referral payments will be made once the prospective firm has been installed and paid their full set-up costs
- Companies on OchreSoft's current three month sales forecast do not qualify
- A referral is live for a maximum of six months from date of registration
- Monetary values accrued can be used against Intelliworks usage or redeemed as cash
- OchreSoft reserves the right to vary the terms of the Referral Scheme at any time without notice
